EDUCATION

Vishwakarma University

Bachelors of Technology in Computer Engineering — CGPA: 8.63

Pune, MH

July 2023 – May 2027

Namo Rims Jr. College

HSC 12th Grade

Pune, MH

2021 – 2023

PROJECTS

VMrentals – Decentralized Virtual Machine Rental Platform | *JavaScript, Stellar(XLM), Freighter*

2025

- Built a decentralized virtual machine rental platform in a 3-member team using Stellar blockchain for payments.
- Integrated Freighter wallet and implemented secure on-chain transaction workflows
- Designed system architecture for decentralized payment validation and VM allocation logic
- Collaborated in a 3-member team; led blockchain integration and payment flow design
- Awarded 1st place at the Stellar Pune Hackathon

Kontri – Group Gift Contribution Platform | *Next.js, Prisma, SQLite, Tailwind CSS*

2026

- Built a full-stack web application for organizing and tracking group gift contributions.
- Implemented authentication, room creation, contribution tracking, and equal bill splitting.
- Used Prisma ORM with SQLite for database management and backend operations.
- Designed responsive user interfaces using Next.js and Tailwind CSS.

ACHIEVEMENTS

Stellar Pune Hackathon – 1st Place

2025

- Secured 1st place among competing teams and awarded a \$500 prize for developing a decentralized blockchain-based virtual machine rental platform
- Designed and presented a functional technical solution within a 3-member team under strict time constraints

Research Publication – IEEE Xplore

2025

- Published a peer-reviewed paper titled “*Comprehensive Comparative Analysis of Food Classification Using YOLOv8n, VGG19, and InceptionV3*”
- Conducted comparative evaluation of deep learning architectures for food image classification, analyzing model accuracy, computational efficiency, and performance trade-offs
- DOI: 10.1109/ESCI63694.2025.10988355

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, SQL, Java, HTML/CSS

Developer Tools: Git, VS Code, NeoVim, Linux

Libraries: Pandas, NumPy, Matplotlib
